

## Why Kansas Needs Health Reform: By the Numbers

Our broken health care system forces families and businesses to struggle with skyrocketing costs and puts millions of Americans at risk of losing the insurance they have now. Here is how our broken health care system affects people in Kansas.

- 70 residents of Kansas are losing health insurance every day, and 14,000 Americans nationwide lose insurance daily.
- The average family premium in Kansas costs \$900 more because our system fails to cover everyone—and \$1,100 more nationally.
- Our broken health insurance system will cost the Kansas economy as much as \$1.7 billion this year in productivity losses due to the uninsured—and up to \$248 billion nationally.
- In Kansas, the uninsured rate grew from 10.3 percent in 2000 to 12.1 percent today.
- 330,000 are uninsured today in Kansas.
- In Kansas the combined market share of the top two insurers is 69 percent, limiting employers' and families' health insurance options as well as the care they receive.
- The average family premium will rise from \$12,766 to \$21,783 by 2019 in Kansas without health care reform.
- In Kansas, without health care reform, 50,630 will have lost coverage from January 2008 to December 2010.
- In Kansas, 169,000 people would gain coverage as a result of the House health care reform bill by 2013, and 271,000 would gain coverage by 2019.
- A typical Kansas family will pay \$21,783 for health coverage in 2019 without health care reform.

---

### In their own words

Wayne, 62, had congestive heart failure. With medication, he felt much better and was able to care for his wife, who had colon cancer, and work as a volunteer maintaining the local park. Unfortunately, he could not afford the heart catheterization that was needed to address the reason for his heart failure. When he turned 65, he qualified for Medicare. His delayed care issues were finally addressed, but unfortunately his disease had progressed to the point where he had only minimal improvement in his heart. After multiple hospital admissions, he died of heart failure at the age of 67.

## Additional national statistics

- 128,000 small business jobs and \$84 billion per year can be saved with health reform.
- At least 62.1 percent of bankruptcies in 2007 were medical bankruptcies.
- The typical household will pay \$15,000 for health care this year—and they'll pay \$18,000 next year.
- The typical household will be paying \$36,000 for health care by 2020.
- We can save \$600 billion by modernizing our health care system.
- Twenty-five million Americans are underinsured, meaning that out-of-pocket health care costs absorbed 10 percent or more of a family's income or 5 percent of an adult's income.
- Almost 52 million Americans are uninsured.
- Approximately 87 million people—one in three Americans—went without health insurance for some period during 2007 and 2008.
